

Executive Summary:

## An Avanade Virtual Webinar

# ERP in 100 Days

Imagine being able to design and deploy a powerful, flexible ERP platform in 100 days without the pitfalls of a traditional ERP installation, one that would allow you to make sense of all the data and signals that now come into every part of your business. What if you could then use that information to make better decisions? Now imagine being able to call on some of the world's top experts to deploy your project on a fast-track schedule in a way designed to provide you exactly the capabilities required to meet your project's objectives.

Avanade and Microsoft recently met with a select group of industry executives to introduce ERP in 100 Days with Dynamics 365, a program that allows companies to deploy a state-of-the-art comprehensive, flexible ERP system without the delays, cost and risk of a traditional ERP project. Concept to completed rollout in 100 days, based on three core principles:

### Proven approaches

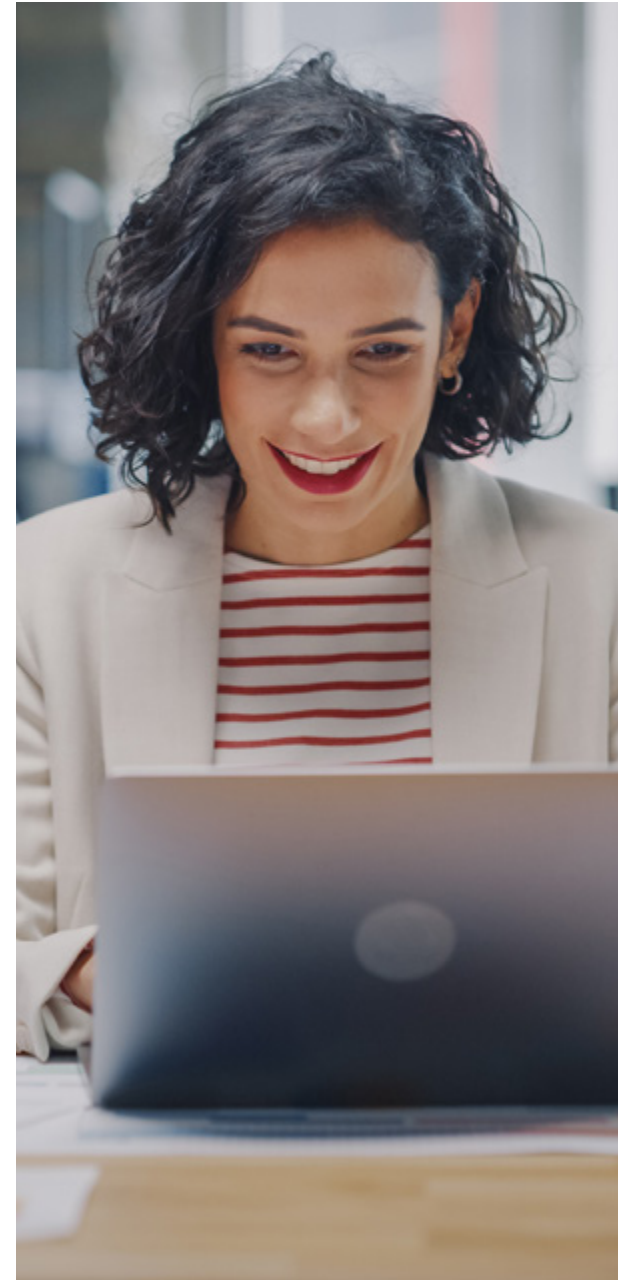

All projects at Avanade use the Avanade Delivery Framework, which has been tried and tested with more than 20 years of knowledge, from inception through execution for consistent and predictable results.

### Reuse, not reinvent

Each organization has key distinctions that give it a competitive advantage in the market. We focus on those instead of the things that are industry standard.

### Accelerate with tooling

Tooling improves the efficiency of those participating in an ERP project. With the right tools, they can focus on the analytics instead of mechanical tasks.

Let's continue the conversation

A few key themes emerged from the webinar and our discussion:

### Companies want an ERP system that supports their unique business

Microsoft Dynamics is a suite of business applications within a broader product offering, and ERP in 100 Days gives you access to them all. Combined with Avanade's business process library, your new platform will allow your company to focus its time on what truly adds value – and taking advantage of these product synergies eliminates costly customizations.

### No one can afford mistakes or downtime

This system is being successfully deployed for companies around the world. By leveraging the proven Dynamics platform and Avanade's decades of technology expertise, you can have confidence that your deployment is in good hands. And from concept to rollout, the ERP in 100 Days team partners with you to ensure result we all will be proud of.

### It's important an ERP system stay up to date

Microsoft releases Dynamics updates throughout the year. Access to the updates, new features and benefits ensures the system is always current, giving your company the flexibility it needs to compete.
